## PROFILE SUMMARY

Final year BSc (Hons) IT graduate specialized in Software Engineering, with handson internship experience building production-level full-stack systems and APIs. Proficient in JavaScript/TypeScript, React, Next.js, Node.js, ASP.NET Core, and Python, with practical exposure to machine learning, Docker, and Git/Agile workflows. Seeking a Software Engineering internship to contribute to real-world product development.

## INTERNSHIP EXPERIENCE

**Software Engineer Intern** **June 2025 – November 2025**

OXZON AI - Jaffna, Sri Lanka (Remote)

- Contributed to three production-level systems:
  - **AutoParts POS System -** Designed REST APIs using ASP.NET Core, integrated SQL Server, and implemented role-based billing with JWT and PDF invoice generation.
  - **WeddingHub Site Builder -** Built full-stack features using NestJS and Next.js: user registration, template editing, and wedding data management.
  - **iFolioo Portfolio App -** Worked on API integration, contact form logic, and responsive UI in a Next.js + NestJS stack.
- Implemented Tailwind CSS frontends, NestJS/ASP.NET Core backends, connected via SQL, LINQ, and JWT-protected endpoints.
- Collaborated via Git, submitted pull requests, and practiced Agile methods including daily updates and task tracking.

  **Tech Used:** ASP.NET Core, NestJS, Next.js, SQL Server, JWT, LINQ, Tailwind CSS, Git, Agile

## PROJECTS

**Unified Pet Care Ecosystem - AI Driven Pet Nutrition System** **Apr 2026**

Final Year Project

- Developed an AI-driven diet recommendation system generating personalized meal plans for cats and dogs using machine learning.
- Evaluated CatBoost, Random Forest, XGBoost, and LightGBM; selected CatBoost for best accuracy and native categorical handling.
- Built multi-output regression predicting protein, carbs, fat, calories, and meal frequency from pet profile data.
- Designed microservice architecture (Mobile UI → FastAPI → CatBoost ML → diet engine) with food safety alerts.
- Dataset and outputs validated by licensed veterinary professionals for clinical accuracy.

  **Tech Used:** Python, CatBoost, FastAPI, Machine Learning, Flutter, REST APIs

**Personal Finance Tracker System - RESTful API** **Apr 2025**

3rd Year Individual Project

- Built a secure RESTful API with JWT auth, role-based access, budget tracking, recurring transactions, and multi-currency support.
- Personalized dashboards with real-time alerts for budget limits and spending trends.

  **Tech Used:** Node.js, Express.js, MongoDB, JWT

**Full Stack Food Delivery Application** **Mar 2025**

- Complete food ordering platform with authentication, cart, Stripe payments, and real-time order tracking.

  **Tech Used:** React, Node.js, Express.js, MongoDB, Stripe

**Online Supplier Management Web App** **Oct 2023**

2nd Year Group Project

- Centralized supplier, order, and stock management with live inventory updates and automated ordering.

**Tech Used:** Java (MVC), MySQL, HTML, CSS, JavaScript

## TECHNICAL SKILLS

**Languages & Frameworks:** JavaScript, TypeScript, Python, C#, C++, PHP, Java, React, Next.js, Node.js, Express.js, NestJS, ASP.NET Core, .NET

**Databases:** MongoDB, MySQL, Microsoft SQL Server, LINQ

**DevOps & Tools:** Git, Docker, Linux, Fast API, REST API, Visual Studio Code, Figma

**Concepts:** OOP, RESTful API Design, JWT Authentication, Agile/Scrum, Role-Based Access Control

## SOFT SKILLS

- Critical Thinking Time Management Communication
- Teamwork Collaborative Problem Solving

## LANGUAGES

- English - Full Working Proficiency
- Sinhala - Native

## EDUCATION

**Sri Lanka Institute of Information Technology (SLIIT), Malabe** **2022 – 2026**

BSc (Hons) in Information Technology, Specialized in Software Engineering

**Ave Maria Convent, Negombo, Western Province** **2021**

G.C.E. Advanced Level: Chemistry (C), Combined Mathematics (C), Physics (B)
