Profile Summary

Final year BSc (Hons) Information Technology undergraduate specialized in Software Engineering, with hands on experience building full-stack web applications, RESTful APIs, and machine learning driven systems. Proficient in JavaScript, React, Node.js, and Python, with practical exposure to AI/ML model development, Docker, and Git workflows. Seeking a Software Engineering internship to apply problem-solving skills and contribute to real-world product development

Projects

Unified Pet Care Ecosystem AI-Driven Pet Nutrition System (Final Year Project) Apr 2026

- Developed an AI-driven Pet Nutrition and Diet Recommendation System generating personalized, adaptive meal plans for cats and dogs using machine learning.
- Compared CatBoost, Random Forest, XGBoost, and LightGBM regression models; selected CatBoost for superior accuracy and native categorical feature handling.
- Built a multioutput regression model predicting protein, carbohydrate, fat, calorie, and meal-frequency requirements from pet breed, age, weight, activity level, and health conditions.
- Designed a microservice architecture (Mobile/Web UI -> FastAPI backend -> CatBoost ML model -> diet generation engine) with real-time alerts for harmful foods and nutritional imbalances.
- Validated dataset and system outputs with licensed veterinary professionals to ensure clinical accuracy and reliability.
- **Tech Used:** Python, CatBoost, FastAPI, Machine Learning, Flutter, Nodejs, REST APIs

Personal Finance Tracker System (RESTful API) (3rd Year Individual Project) Apr 2025

- Developed a secure RESTful API with JWT-based authentication and role-based access (Admin & Regular User), enabling users to manage income/expenses, set budgets, and track financial goals.
- Implemented features like tag-based filtering, recurring transactions with reminders, auto-savings, and multi-currency support using a 3rd party exchange rate API.
- Built personalized dashboards and financial summaries for each user role, with real-time alerts for budget limits and spending trends.
- **Tech Used:** Node.js, Express.js, MongoDB

Full Stack Food Delivery App Mar 2025

- Developed a complete food ordering platform with user authentication, cart functionality, and Stripe payment integration.
- Implemented real-time order tracking and status updates for users and administrators.

- **Tech Used:** React, CSS, Node.js, Express, MongoDB, Stripe
-

Technical Skills

Languages & Frameworks: JavaScript, TypeScript, Python, C#, C++, PHP, Java, React, Next.js, Node.js, Express.js, ASP.NET, .NET

Databases: MongoDB, MySQL, Microsoft SQL Server

DevOps & Tools: Git, Docker, Linux, Shell Scripting, FastAPI, REST API Development, Visual Studio Code, Figma

Concepts: Object-Oriented Programming (OOP), RESTful API Design, Authentication & Authorization (JWT), Agile/Scrum basics

Soft Skills

- | | | |
|---------------------|-------------------------------|---------------------|
| • Critical Thinking | Management Skills | Communication Skill |
| • Time Management | Collaborative Problem Solving | Teamwork |

Languages

- English: Full Working Proficiency
 - Sinhala: Native

Education

Sri Lanka Institute of Information Technology (SLIIT)	Malabe
BSc (Hons) in Information Technology Specialized in Software Engineering	2022 – 2026
Ave Maria Convent	Negombo, Western Province
Advanced Level: Chemistry: C, Combined Maths: C, Physics: B	2021
